

Welcome to Nexus AI

Nexus AI is an intelligent assistant designed to answer questions from your uploaded documents.

You can ask questions in natural language like: 'What is the leave policy?' or 'Summarize the HR rules.'

The system uses advanced AI with document grounding (RAG) to provide accurate answers.

You will also see citations showing where the answer came from (document name and page number).

Try different modes like 'Explain like I'm 5' or 'Summarize in bullet points' for better understanding.

Give feedback using thumbs up/down to improve results.
